

Clinical Literature review for an Evidence-based Medicine

Clinical Literature review for an Evidence-based Medicine

Research Services for Clinical Literature review for an Evidence-based Medicine

Literature review is the collective evidence of original research from the past by evaluating clinical medical librarian (CML) program. Our team has expertise in data analysis, qualitative and quantitative research methods, and we continue to enhance the quality of Literature review methodologies by following internationally accepted standards. We appraise and synthesize the available high-quality evidence and use to inform policy decision making with greater effect for public and private services around the globe. We combine peer-reviewed evidence with local knowledge to provide decision-makers with justified recommendations for project and policy changes that safeguard and enhance health.

Our Comprehensive Clinical Literature review

- > Formulate the research question
- > Search for studies
