Literature Review & Gap

Scientific Literature Review and Research Gap Analyses

Pubrica Researcher Team develops a good review that can be an invaluable tool to the practitioner, providing a succinct summary and analysis of the pertinent information in a given area.

The reasons for undertaking a literature review are numerous and include eliciting information for developing policies and evidence-based care, a step in the research process and as part of an academic assessment. Its goal is to bring the reader up-to-date with current literature on a topic and form the basis for another goal, such as the justification for future research in the area. At Pubrica, develop a good literature review that gathers information about a particular subject from many sources. Our team has experience and expertise in writing clinical literature review, that is well written and contains few if any personal biases. The team has strong

research background, therefore the articles chosen to contain a clear search and selection strategy.
