

## Post-editing Services

### Post-editing services

Today, advances in computer technology have made machine generated content or translation a reality. Post-editing implies reworking and editing content that is generated from a machine output to ensure that the content meets the requirements. For example, you may need to edit the content of a foreign language translation performed by a computer application or online translation services. Pubrica's post-editors assist you in post-editing services. Get support in full scale and light scale post-editing work from the experts in the industry.

In full or complete editing, our post-editors will take a heavy-handed approach to your content editing requirements such as style and presentation for internal as well as external audience; however, in a light scale editing, post-editors' engagement in the content is negligible. Checks are done to ensure the material is comprehensible for internal communication purposes.

### Pubrica Offerings

*Pubrica offers you complete publishing support across a variety of publications, journals, and books. You can now morph your concepts into incisive reports with our array of writing services: regulatory writing, Clinical Report Forms (CRF), biostatistics, manuscripts, business writing, physician reports, medical writing and more. Experts in Science, Technology, Engineering and Mathematics (STEM), and pundits with therapeutic repertoire. Publishing that medical paper or getting a regulatory drug approval is now easy. Save time and money through Pubrica's support.*
