Write, edit, and publish in leading journals
- Publish in high-impact factor journals
- Native English writers to assist you
- Partnerships with leading publishing firms
- Expertise in niche areas of specialization
- Complete support in all phases of publishing

Pubrica offers outstanding manuscript editing services. Editing is often confused with proofreading, which is the correction of grammar, spelling, and other superficial errors, and which forms the final part of the editing process. Scientific writing editing is about revising and organizing the content of the paper to be more concise and precise. The process eliminates wordiness and contains jargon to a minimum, enabling better communication.

A research paper editing, mainly PhD thesis editing, will be better off when done by experts of the field who have a command over the language. Pubrica does just that for scientific paper editing, we employ experts in the area, who are either native English speakers or have studied in mainland Europe or the US. Any academic paper editing process must go through multiple revisions while maintaining the crux of the content within.

The editing service offered by us includes scientific manuscript proofreading services, and thus, the organizational quality is complemented by ridding the paper of any errors in grammar, spelling, or vocabulary. The superior quality of your product is ensured by our quality assurance team, who check it multiple times before approving it for submission. We also make sure you are engaged throughout the whole procedure and ask for your opinion before making any significant changes.

Our Services

Academic English editors in your field will review
We Always Look for Ways to Improve your Overall Experience, and so we Offer you

*Three-Editor* System and Native English-speaking Editors

Under our “Three-Editor” System, manuscripts are reviewed by two highly skilled editors to ensure language consistency and accuracy. After a thorough edit by a PhD-qualified subject-area specialist, a second editor polishes and refines your paper to remove any existing ambiguities. Our editors are all native English speakers (US, UK, Australia, and Canada) and familiar with the issues which occur in ESL writing.

Specialized Subject-area Matching

Every manuscript submitted to us is matched to editors with highly specialized subject-area expertise. For example, a paper in Neurology will be edited by an editor who is an MD in Neurology, not by a specialist in Medical Sciences. This technical competency enables us to optimize the content as well as the language and pay due attention to even the most subtle intricacies.

The Pubrica Promise

“The Pubrica Promise” guarantees that a manuscript edited by us will never be rejected on the basis of poor language. On a rare occasion if rejection occurs, we will take full responsibility of re-editing the paper for resubmission at no additional cost. Our stringent systems and processes, professional editors, and in-house quality management system help us in delivering this promise to our authors.

Service we offer
