RSNA Open Access Policy

RSNA offers traditional subscription model publishing, also called Hybrid Open Access (Hybrid OA), Gold Open Access (Gold OA) licenses, a Green Open Access (Green OA) option, and Read and Publish agreements for institutions. Works submitted under the Open Access licenses are treated the same as those submitted under the traditional subscription/Hybrid model. There are no differences in the peer review, editorial, and production processes.

Hybrid Open Access

All frontlist RSNA journal content is published under the Hybrid OA model and publicly available after 12 months. For *Radiology* and *RadioGraphics*, content is publicly available for 4 years following publication and then placed in the *Radiology* Legacy Collection or the *RadioGraphics* Legacy Collection and requires a paid purchase. RSNA holds copyright to all content and proper re-use permission must be obtained from [CCC Marketplace](#).

For authors whose work was supported financially by National Institutes of Health, Howard Hughes Medical Institutes, or Wellcome Trust, the final version of the article will be automatically deposited with PubMed Central and made freely available at the conclusion of a twelve-month embargo from the date of final publication. If you are required to submit to PubMed Central without an embargo, please see our Gold OA options below.

Gold Open Access

License (CC BY) and **Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License (CC BY-NC-ND)** . These licenses allow others to copy and redistribute the article based on each license specification. RSNA does not retain copyright; however, proper attribution must be given to the RSNA and the authors.

CC BY 4.0 License

This license allows others to copy and redistribute the article in any medium or format, even for commercial purposes. It also allows others to remix, transform, and build upon the article for any purpose. Proper attribution must be given to RSNA and the authors.

CC BY-NC-ND 4.0 License

This license allows others to copy and redistribute the article in any medium or format, except for commercial purposes. It does not allow others to distribute the article if it has been remixed, transformed, or built upon. Proper attribution must be given to RSNA and the authors.

Article Processing Charges (APCs)

Authors who request Gold OA publication must pay an article processing charge (APC) of USD \$3,500 after final acceptance of their submission. Author(s) may withdraw their article at any time prior to acceptance without incurring an APC. After acceptance, withdrawal will not be permitted and a refund will not be given. Any special consideration will be at the discretion of the Publisher. Once the APC is received, the final, peer reviewed, copyedited work will be made freely available on the journal website.

Funder Mandates

Authors supported by Wellcome Trust, cOAlition-S organizations, or other funders requiring immediate access should submit their manuscripts under the Gold OA option. For Wellcome Trust, National Institutes of Health or Howard Hughes Medical Institutes, the final version of the article will be deposited to PubMed Central and made freely available at the conclusion of a twelve-month embargo from the date of final publication. Authors who choose Gold OA may deposit their article to PubMed Central prior to the 12-month embargo.

If your funding mandate requires publication in a fully OA journal, please submit to [Radiology Advances](#). More information on the OA policies for *Radiology Advances* can be found in the [Author Guidelines](#) page.

RSNA Members

RSNA members with the Full Access package are eligible for a 15% discount on applicable open access APCs. Please provide your membership ID when submitting. If you are interested in becoming a Full Access member of RSNA, please [refer to the membership page](#) to learn more. Requests for OA publication can be made at the time of submission through a question in the submission system. Requests after submission can be made by contacting the [journal editorial office](#).

Green Open Access

Authors who are required to deposit their Author Accepted Manuscripts in their institution's online repository may publish under the Green OA option. Works published under Green OA are subject to a twelve-month embargo from the date of final publication. RSNA holds copyright to all content published under Green OA and proper re-use permission must be obtained from [CCC Marketplace](#) . If a CC BY or CC BY-NC-ND license is required, please see our Gold OA policy above.

The society actively encourages open access in scholarly communication by offering Read and Publish agreements. RSNA Read and Publish agreements are based on a flexible model designed to encourage authors to publish original research under the CC BY license and unlimited reading access to RSNA's five journals. If your institution is interested in exploring a Read and Publish agreement with RSNA, please contact license@rsna.org.

Participating Institutions

Corresponding authors at member institutions may publish with RSNA under a Read & Publish transformative agreement. Current member Read and Publish agreements:

Chinese University of Hong Kong	Open Access Publishing	<i>Radiology, RadioGraphics, Radiology: Artificial Intelligence, Radiology: Cardiothoracic Imaging, Radiology: Imaging Cancer</i>
