

JOURNAL SUBMISSION

**PREVALENCE OF ANEMIA IN PATIENTS ATTENDING A
TERTIARY CARE HOSPITAL IN NORTHERN INDIA**

Journal Selection Report

Job code	xxxxxxx
Manuscript title	Prevalence of Anemia in Patients Attending a Tertiary Care Hospital in Northern India
Date	xxxxx
Author preferences	Keywords: Prevalence, Anemia, Tertiary Care Hospital, Northern India, Iron Deficiency, Hemoglobin, Nutritional Deficiency, Public Health, Patients, Cross-sectional Study
Comments on Adherence to Author Preferences	All recommended journals have regularly published articles on topics related to the authors' Area of Research / Idea

Journal Recommendations

Journal name	Comments
British Journal of Haematology <i>Publisher: Wiley</i>	<p>The Reason for the recommendation:</p> <ol style="list-style-type: none"> An official journal of the British Society for Haematology, the <i>British Journal of Haematology</i> offers your research high visibility, receiving nearly 5 million article downloads annually. Content is delivered through a range of article types, including Original Papers, Reviews, BSH Guidelines, Images, and Wider Perspectives and Global View papers. The journal covers every specialism within haematology and welcomes high-quality papers not just in clinical practice, but in the fields of basic science, translational research, and developments in haematology science. With fast turnaround times and personalized feedback from experts in the field, we provide a friendly submissions process that works collaboratively across haematology so every submitted paper has a home. The journal published several articles on topics like authors' Area of Research / Idea, e.g., <ul style="list-style-type: none"> Xu, L., Wang, J., Zhao, W., Wang, Y., Hu, Y., Li, Y., Lai, W., Yong, J., Gao, C., Liu, D., and Gao, X. (2026), Flow cytometry-guided ex vivo drug sensitivity testing informs venetoclax-based therapy in acute undifferentiated leukaemia. <i>Br J Haematol.</i> https://doi.org/10.1111/bjh.70499 Arai Y, Jo T, Sato T, Sakurai M, Kaji D, Kitawaki T, et al. Decreased renal function predicts severe cytokine release syndrome after CAR-T-cell therapy for large B-cell lymphoma. <i>Br J Haematol.</i> 2026; 00:110. https://doi.org/10.1111/bjh.70488

<p>Transfusion <i>Publisher: Wiley</i></p>	<p>The Reason for the recommendation:</p> <ol style="list-style-type: none"> 1. <i>Transfusion</i> is the foremost publication in the world for new information regarding transfusion medicine. As the journal of the Association for the Advancement of Blood & Biotherapies, we report on the latest technical advances, discuss opposing viewpoints regarding controversial issues, and present key conference proceedings. In addition to blood banking and transfusion medicine topics, we present submissions concerning patient blood management, tissue transplantation and hematopoietic, cellular, and gene therapies. 2. The journal published several articles on topics like authors' Area of Research / Idea, e.g., <ul style="list-style-type: none"> • Leahy, M.F., Hofmann, A., Towler, S., Trentino, K.M., Burrows, S.A., Swain, S.G., Hamdorf, J., Gallagher, T., Koay, A., Geelhoed, G.C. and Farmer, S.L. (2017), Improved outcomes and reduced costs associated with a health-system-wide patient blood management program: a retrospective observational study in four major adult tertiary-care hospitals. <i>Transfusion</i>, 57: 1347-1358. https://doi.org/10.1111/trf.14006 • Cohn CS, Dunbar NM, Kaplan A, Spinella PC, Young PP, Ziman A. How do we maintain a dual inventory of room temperature stored platelets with cold-stored platelets? <i>Transfusion</i>. 2025;65(7):1218–1222. https://doi.org/10.1111/trf.18289
<p>The American Journal of Clinical Nutrition <i>Publisher: American society for nutrition</i></p>	<p>The Reason for the recommendation:</p> <ol style="list-style-type: none"> 1. A highly rated peer-reviewed, primary research journal in nutrition and dietetics, <i>The American Journal of Clinical Nutrition</i> publishes the latest research on topics in nutrition, such as obesity, vitamins and minerals, nutrition and disease, and energy metabolism which are relevant to human and clinical nutrition. 2. The journal published several articles on topics like authors 'Area of Research / Idea, e.g., <ul style="list-style-type: none"> • Bonaccio, M., Costanzo, S., Di Castelnuovo, A., Ruggiero, E., Panzera, T., Esposito, S., Cerletti, C., Donati, M. B., de Gaetano, G., & Iacoviello, L. (2026). Food consumption according to degree of processing and risk of breast cancer: prospective findings from the Moli-sani Study cohort. <i>The American Journal of Clinical Nutrition</i>, 101319, 101319. https://doi.org/10.1016/j.ajcnut.2026.101319 • Gough, T., Mann, T., Ahmadyar, K., Finlay, I., Jones, A., Tapper, K., & Robinson, E. (2026). Eating whilst distracted: A systematic review and meta-analysis of the effect of distraction on concurrent and later intake in adults. <i>The American Journal of Clinical Nutrition</i>, 101315, 101315. https://doi.org/10.1016/j.ajcnut.2026.101315

	Figure/Tables	5-10 figures/tables	Up to 8 total	Not mentioned
	References	Maximum of 12 references.	No Limit	50 References

Supporting Information - Rationale for Inclusion and Scope

<i>British Journal of Haematology</i>	
Rationale for inclusion	This journal is highly reputable in Hematology and publishes peer-reviewed research on blood disorders, including anaemia. It ensures credibility, quality, and relevance for academic and clinical studies.
Scope	Covers research on blood diseases such as anaemia, leukaemia, coagulation disorders, diagnosis, pathophysiology, and treatment methods. Suitable for both clinical and laboratory-based studies.

<i>Transfusion</i>	
Rationale for inclusion	A leading journal in transfusion medicine, it provides reliable, peer-reviewed research on blood transfusion practices, safety, and innovations making it highly relevant for studies related to anemia management and blood therapy.
Scope	Focuses on Transfusion Medicine, including blood donation, blood banking, compatibility testing, transfusion safety, immunohematology, and clinical use of blood and blood components.

<i>The American Journal of Clinical Nutrition</i>	
Rationale for inclusion	A highly respected journal in Clinical Nutrition that publishes evidence-based research on diet and health. It is especially relevant for studies on anemia linked to nutritional deficiencies (e.g., iron, vitamin B12, folate), ensuring strong scientific credibility.
Scope	Covers human nutrition, dietary assessment, nutrient deficiencies, metabolism, and the role of nutrition in disease prevention and management, including conditions like anemia.

Appendix: Frequently Asked Questions

1. What is a Journal Selection Report?

A Journal Selection Report helps authors identify suitable journals for submitting their manuscript based on topic, scope, indexing, and publication criteria.

2. Why is journal selection important?

Choosing the right journal improves the chances of acceptance, faster review, and reaching the correct academic audience.

3. Which journals were recommended for this manuscript?

The recommended journals are:

- British Journal of Haematology
- Transfusion
- The American Journal of Clinical Nutrition

4. Why was the British Journal of Haematology recommended?

It is a high-impact journal focused on hematology and publishes strong research on anemia and blood disorders.

5. Why is Transfusion a suitable journal?

It is ideal for studies related to blood management, transfusion medicine, and anemia treatment practices.
